CONTROL CODE DESCRIPTION:

- 9 - Programmable electronic metering pumps feature highly accurate microprocessor control with custom liquid crystal display and 4-key tactile keypad. Externally controllable by means of 4-20 mA signal (fully programmable) or pulse (voltage-free reed switch, transistor, or opto-coupler). Divide or multiply incoming pulses or batch accumulate. Manual/External mode selection allows for manual adjustment of stroke length and stroke speed from 1 stroke per hour to 100 strokes per minute. Flow monitoring with alarm is available when used with LMI's Digi-Pulse™ Flow Monitor (see catalog no. 1708 for models and specifications).
- 7- Metering pumps feature external control by means of a pulse input (voltage-free reed switch, transistor, or optocoupler). Manual/External mode selection allows for manual adjustment of stroke length and stroke speed. When used with LMI's Micropace™ Pump Control Modules (see catalog no. 1609 for models and specifications), divide/multiply incoming pulses or respond directly and proportionally to a 4-20 mA input signal.
- 1- Metering pump features precise manually adjustable stroke speed from 1 to 100 strokes per minute (1-60 on P12, P13) Stroke length manually adjustable.
- 0- Metering pump features fixed speed and manually adjustable stroke length.

Note: Series E pumps are shipped without power cords and are designed to be hardwired only. Only voltage codes 1 and 2 may be ordered with Series E pumps.

Liquid Handling Assemblies For 300 & 400 Series Liquid Ends:

To specify 1/4" NPT, male: change I to P (example: "352TP") and add \$10.00

Please note NPT Liquid Ends are not available for Liqui-Pro acrylic heads (410XP, 450XP, 460XP, and 490XP).

To specify black, UV-resistant tubing: change I to U (example: "352TU") and add \$7.00

To specify Bleed Four Function Valve: change S to B (example: "352BI").

For suction lift applications, pumping either sodium hypochlorite or hydrogen peroxide, "HI" liquid ends are recommended. An "HI" liquid end consists of an auto prime valve and a 4FV. For PVC and PVDF heads, the PVC auto prime valve is included. For acrylic heads, the acrylic auto prime valve is included. A 4FV enables safe pressure release of process fluid. Autoprime valve will recirculate 10% to 20% of pump discharge back to the supply tank, pump output should be adjusted accordingly.

Please note all standard liquid ends are shipped with PE tubing. PE tubing is not recommended for all applications, therefore, please refer to LMI Chemical Resistance chart (1100.F) for material compatibility. When PE tubing is not suitable for the application, please contact your local master distributor for alternative tubing materials.

Application Notes

Slurry Feeds with Abrasive Solids - Use Liquid End Assemblies 29, 79 or 89 with corresponding size drive assembly. (Max. solids 5% by weight)

Pressure Prime or Flush - Use Primer -Flush Kit:

No. 37393 for .375" tubing (300 & 400 Series LE's) No. 37399 for .5" tubing (300 & 400 Series LE's)

No. 26220 for .375" tubing (except 300 & 400 Series LE's) No. 26221 for .5" tubing (70 & 80 Series LE's)

No. 26708 for .5" tubing (20 & 30 Series LE's)

High Viscosity Fluids, Polymers - Use Liquid End Assemblies 20HV, 25HV, 75HV, 76HV, 85HV, 86HV, 155HV or 156HV with corresponding size drive assembly. Pump output may be reduced in some applications. Also, please note that no foot valve is included with HV liquid ends.

Stainless Steel Liquid Ends - Liquid End Assemblies 217, 277, 297, 257, 27, 37. Please note no foot valve or injection valves are included with these Stainless Steel liquid ends.

Accessories - Request Bulletin 1951 for descriptions of accessories designed to make the installation and operation of your LMI pump easier and more efficient.

Hastelloy® C Head Screws - are available for pumps that will be used with strong acids or other applications where Hastelloy® C will provide better results than the standard 316 S.S. head screws. Please refer to the LMI Chemical Resistance chart and to your chemical supplier for suggested materials. See head screw kits: #37144 and #38735.

Series HH Pumps - are for high pressure applications only. For low output at pressures below 250 psi, select the Series AA9 pumps. The minimum system pressure necessary for an HH9 application is 100 psi.
